

Youth and Teens

Since we have numerous young people in our community, Lake Worth West Community Center provides many services designed to give them confidence to continue their education, break the cycle of poverty, and stay clear of crime and other distractions.

We offer homework assistance, after-school programs, summer day camps, special events, and other activities.

One of our most-attended programs is the college prep club. It's open to high school students in grades 9 through 12, and is geared to strengthen their academics and help them get into the right college and launch their college and career experience.

For younger children, we have a reading club geared for those in kindergarten through fifth grade. Those kids can also get assistance with their homework and school projects during our after-school program.

In addition, our center offers soccer, golf and other sports programs to encourage our youth to stay active and healthy.

College Prep Teen Club
